

Terminology for Corner Frames

Interpretation of our dimensions in our product range

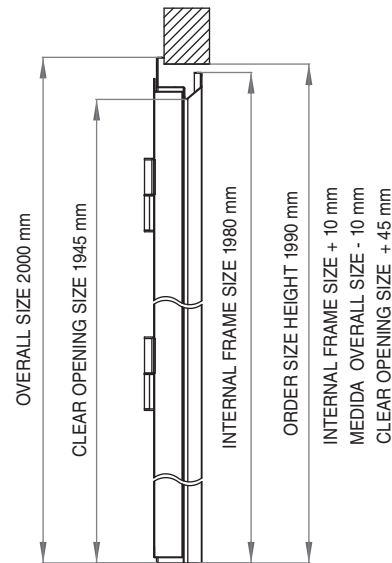

Corner frames: (CS4, CS5, CS65, CSV...): in this case we use the “theoretical” brick to brick dimensions to get the order size, as per following example:

Doors: Internal frame dimensions + 20mm on the width, + 10 mm on the height.

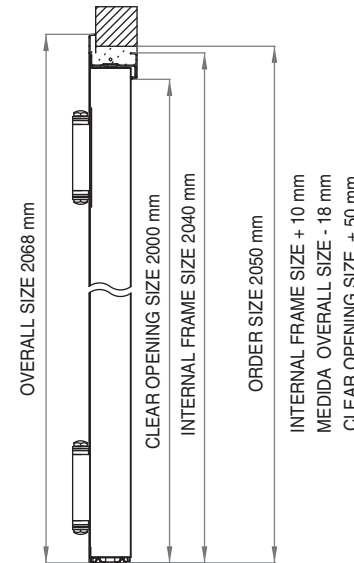

Meter Doors: Internal frame dimensions + 20mm on the width, + 20 mm on the height.

Warning! When it comes to corner frames, even if the order size is usually the one we use to book the order, we will take into consideration the way the door will be installed – with the help of mortar (anchors) or by screwing. In the last case we will use the INTERNAL FRAME DIMENSIONS as the order size.
