

CoBo System

Concealed Hinge Combination (BO) and the Hidden Door Closers (CO)

Galvanised

Stainless steel AISI 430 / 304 / 316

Powder coated

CoBo System

1 and 2 Leaf Door

STRUCTURE

The Concealed Hinge Combination [BO] (A) and the Hidden Door Closers [CO] (B) form the so-called CO-BO System.

The COBO System can be installed in the following door models: Turia, Turia Premium and Sigma. In all of these models, in either a single or a double leaf.

FRAME

CS5 corner frame.

CS65 corner frame.

Incorporates anti-crow bar bolt (C).

Removable leaf (D).

Possibility of tube stainless hinges and trim.

The TU/VO hinges and vice versa cannot be replaced.

CONCEALED HINGE

3mm thick galvanized or stainless steel own design hinge with CE marking. Housed within the frame, it remains invisible on both sides of the door.

It is available in galvanized finish, stainless steel or lacquered in Ral.

It is recommended to install an opening restrictor (stopper) to prevent the leaf opening more than 105°.

HIDDEN DOOR CLOSERS

ECO MULTI-GENIUS door closers with 3-5 strength, with the body embedded in the top of the leaf and the guide built in the frame. It can be mounted on doors of 1 or 2 leaves.

CLOSING SELECTOR

Double leaf models have an integrated Closing Selector.
